SECTION 17 NATIONAL RECORDS- NRA National Records shall be established only by American citizens who are NRA members and junior members of NRA affiliated clubs. National Records may be established only when competition exists, i.e., more than one competitor or team in an event.

When new National Record categories are established, a data collection period will be held until the end of the calendar year (starting 1 January) in which the record was authorized. At the end of the calendar year, the highest score submitted will be recognized as the new National Record and the data collection period will expire. New National Records will then be recognized as they are set.
